

AC VOLTAGE/CURRENT DETECTOR

Current sensor detects live circuits through shielded wires or conduit

This product never made it into the catalog. Copy needs to be edited/rewritten and changed in original text file.

FEATURES:

- The only 2-in-1 current/voltage detector designed for electrical testing
- Non-contact AC voltage detection from 12V to 600V AC
- Non-contact AC current detection from 200mA to 1000A
- Sensitivity adjustments to increase or reduce sensor trigger threshold
- Loud, audible and bright visible sense detect indicators
- Current sensor detects current flow through shielded wires, conduit and metal circuit breaker/junction boxes
- Current function detects current flow of 400mA at 0.2" distance and at much greater distances for larger current flows
- Convenient pocket size with clip
- Dimensions/Wt: 7.6"L x 1.2" W x 0.9" D (192 mm x 31 mm x 24 mm)
- Weight: 2.1 oz (60 g)
- Complete with 4 LR44 button batteries and pocket clip

APPLICATIONS:

- Trace concealed wires in walls and floors
- Identify "hot" wires
- Trace current flow behind walls, in conduit, where voltage detection does not work
- Sensitivity high enough to trip on low voltage HV AC or similar signal levels
