

DRUM/PAIL ACCESSORIES

5, 30, & 55 GALLON PAIL LINERS

The CON-TROL-CURE™ Pail Liners solve the problem of leaky containers and other environmental concerns. After use, simply replace with a clean liner. No need for costly solvent washings because residue stays in the liner, not the pail. The CON-TROL-CURE™ Pail Liner is especially valuable because many landfill sites will not accept contaminated drums and will only take clean pails and drums that have been cut open.

The 5 gallon has a 15 mil average wall thickness; 30 gallon has a 12 mil average; and the 55 gallon has a 10 mil average. All sizes are made of low density polyethylene. 30 and 55 gallon liners are corrugated. 5 gallon sold individually or 100/case. 30 gallon sold in 25/case only. 55 gallon sold 20/case only.

DRUM-TOP ABSORBENT PAD

Keep work areas safe and reduce maintenance by using the Drum-Top Absorbent Pad. When dispensing inks, coatings, solvents and other liquid materials with a pump directly from 55 gallon drums, puddles may form on top of the drum. To prevent this puddle from spilling over and seeping to the floor, which will create a hazard, the 22" round CON-TROL-CURE™ Drum-Top Absorbent Pad is placed on top of the drum to absorb these materials. Designed with a pre-cut hole for pump handle and constructed with a 0.10" thickness for high absorbency.
