

MINI DIGITAL REFRACTOMETER

Precise, Fast and Easy % Brix Concentration Measurements of Liquids

The Mini Digital Refractometer is a precise, fast and easy way to determine % Brix concentration measurements of various liquid products. This unit features large, easy to read LCD displays in Brix (%) and Refractive Index (nD) and an automatic temperature compensation. It measures from 0% to 45% Brix with 0.1% resolution and 0.1% accuracy; nD from 1.3330 to 1.4098.

FEATURES:

- Large, easy to read LCD displays in Brix (%) and Refractive Index (nD)
- Portable compact design with built-in easy-to-clean prism
- Measure from 0% to 45% Brix with 0.1% resolution and 0.1% accuracy; nD from 1.3330 to 1.4098
- Automatic temperature compensation
- Zero Adjustment function
- Auto power off saves battery life
- Low battery indication
- Complete with 9V battery and case
