

CON-TROL-CURE®

Installation instructions for UV Adhesive Material

1. Identify the Adhesive side vs. the Carrier side.
2. At one corner of the film, use two pieces of adhesive tape, one on one side of the film one on the other.
3. Using the adhesive tape, pull the carrier away from the filter material.
4. The thinner film will be the carrier.

Applying the Material to Glass:

1. Clean the glass with a standard glass cleaning product i.e. Windex.
2. After the glass is cleaned and dried, spray the glass once again with the glass cleaner. Make sure that it is as even an application as possible.
3. Apply the adhesive side of the film to the glass.
4. You will be able to slide the filter material around on the wet glass to achieve desired positioning.
5. Using a stiff card, squeegee out the air bubbles and excess water.
6. Piercing the filter material with a pin can also purge any air bubbles.
7. The adhesive is water activated and will increase the tackiness over night.
8. Trim any excess from the edges.
